FPS-300: Flash Power Supply

The FPS-300 is a new flash power supply designed to replace the Quantum power supply stack and flash head.

Features:

- More reliable design
- Less part count than previous design
- Flash recharge time of 3 seconds (QSS) or 1 second (Transient)
- Two flash connections for use with WCT-120 and SunsVoc simultaneously
- LO and HI flash modes (200Ws and 400Ws, for use with BCT-400/BLS-I)
- Flash counter
- Trigger LED to indicate when a trigger has been received for debugging
- Test flash button for debugging

Custom design for use with:

- WCT-120
- SunsVoc
- BCT-400
- BLS-I

Requirements:

- Latest signal connector box hardware
- Software versions:
  - WCT-120: 4.6.0 or newer
  - SunsVoc: 4.6.0 or newer
  - BCT-400/BLS-I: 4.5.1 or newer
- Remote flash head (provided upon purchase)
